

CLAIMS

1. Eyewear comprising:

a) a lens having a perimeter that defines a cutout along a nose portion thereof;

5 and

b) a frame having an adhesive side comprising a first portion and a second portion, wherein said first portion runs along the perimeter nose portion of said lens, said adhesive side forming a seal between said frame and said lens along the perimeter nose portion the length of said first portion and adapted to form a seal between said frame and at least a portion of the user's face along said second portion.

10

2. The eyewear as claimed in claim 1, wherein the perimeter nose portion and said second portion defines said cutout which is adapted to accommodate the user's nose.

15

3. The eyewear as claimed in claim 1, wherein said adhesive side provides secure attachment between said frame and said lens along said first portion.

4. The eyewear as claimed in claim 1, wherein said adhesive side provides releasable attachment of the eyewear to a user's nose along said second portion.

20

5. The eyewear as claimed in claim 1, wherein said frame comprises a compliant and resiliently deformable material adapted to conform to a portion of user's face.
